PROFESSIONAL SUMMARY

Data and Technology Solutions Experienced Consultant at PwC with focus on building scalable ETL/ELT pipelines and cloud-based data platforms. Experienced in Databricks and Azure, designing bronze, silver, and gold schema transformations from large-scale transactional datasets to support analytics and reporting.

EXPERIENCE

PwC Consulting Services

San Francisco, CA

Associate, Data and Technology Solutions

October 2024 - Present

- Built scalable ETL/ELT pipelines in Databricks and Azure Data Factory to process high-volume transactional datasets, enabling efficient ingestion, transformation, and delivery of data for downstream analytics use cases.
- Developed business logic to reallocate P&L and balance sheet transactions across business units, ensuring accurate financial reporting and enabling drill-down granular performance analysis across segments.
- Engineered data pipelines for financial reporting automation solution, processing 70M+ monthly records and supporting transaction datasets with \$34B+ annual revenue to reduce manual reporting effort.
- Integrated transactional and master datasets into scalable pipelines, utilizing bronze, silver, and gold data models to transform raw transactional data into structured schemas for analytics consumption.
- Contributed to valuation strategy for \$7B+ acquisition by evaluating customer health, identifying churn risks, revenue concentration, and growth drivers, directly influencing asset valuation and unlocked deal synergies.
- Automated customer segmentation workflows using Python to reduce data latency and conduct near real-time risk assessment, identifying growth opportunities and concentrated churn risks worth ~30% total ARR.

PwC Consulting Services

San Francisco, CA

Data and Technology Solutions Intern

June 2023 - August 2023

- Created ETL pipeline for transaction datasets for an M&A deal valuing 3.9B+ using Python, SQL, and Azure tools, transforming data into actionable insights to support strategic decision-making processes.
- Investigated key performance indicator (KPI) movements and interpreted trends within evolving datasets, and communicated business strategies through visualizations and dashboards in Power BI.
- Transitioned ETL processes to Databricks and Azure Data Factory, resulting in efficient organization of financial data into meaningful schemas and increased data observability for business reporting needs.

Binance Swipe Division

San Francisco, CA

Risk and Compliance Consultant Intern

May 2022 - September 2022

- Conducted research and analyzed customer behavior data to identify risks and opportunities. Contributed to improving compliance policies and optimizing product offerings.
- Provided insights for finance and compliance teams, leveraging quantitative analysis of quarterly compliance testing to refine company risk management processes and optimize product design.

Office of Residential Life, UCLA

Los Angeles, CA

Undergraduate Residential Advisor (RA), Lead RA

August 2021 - June 2023

- Serve as live-in advisor for 93 UCLA students to create an inclusive, healthy, safe residential community.

SKILLS AND CERTIFICATIONS

Skills: Database Management, ETL Processes, Customer & Product KPI Analytics, Financial Forecasting

Tools: Python, SQL | Databricks, Azure Data Factory | Azure, AWS | Power BI | Claude Code

Certifications: Azure Data Fundamentals, Azure Developer Associate | Microsoft Certifications; Certified Cloud Practitioner | AWS Certified; Oracle Database SQL | Oracle Certifications

EDUCATION

University of California – Los Angeles, Los Angeles, CA

2020 – 2024

Honors College Candidate for B.S. in Data Theory

GPA 3.81/4.0

Relevant Coursework: Optimization, Data Analysis, Statistical Methods, Machine Learning, Computer Science

Activities: Consultant, International Bruins in Business; Project Lead, ArtReach UCLA; Club Gymnastics
